

IMMUNE PACK

IMMUNE PACK

Discussion

The Wellness Warrior Immune pack has everything you need to maximize your immune system. Complete with more advanced formulas for those looking to boost their immune function, each tear-away bag includes one vitamin C, one zinc, one probiotic, and one quercetin capsule. These formulas effortlessly work together in your body to help strengthen your functions and protect against harmful viruses.

In general, the quality and convenience of our packs take away the hassle and stress that can come with remembering to take time for your health! Simply tear off your daily pack with your specially formulated supplements and feel confident knowing your systems are receiving the best of the best.

Vitamin C:

One of the best fighters against disease! Vitamin C helps to boost your immune system and manage your blood pressure in order to help protect against illnesses like diabetes, heart disease and cancer.

Zinc:

Another great tool in the fight against disease, Zinc is a versatile vitamin that works to enhance your immune function and decrease rapid virus regeneration within your systems. While supporting enzymatic reactions and protein metabolism, Zinc also boosts your antioxidant activity – which can decrease damages to your cells.

Probiotic:

Necessary for healthy immune function, probiotics provide beneficial bacteria for your body to fight viruses that make you sick. Additionally, they support digestive functions, aid in weight loss and can improve mental health. Lack of a healthy balance of probiotics in your system can result in adverse effects ranging from GI symptoms to impaired immune response.

Quercetin:

The inclusion of Quercetin in your Immune pack helps to ensure the proper absorption of all of the essentials (including your vitamin C and zinc)! Additionally, it has been known to decrease allergy symptoms and fight inflammation within the body.

CLINICAL APPLICATIONS

- ◆ Promotes hormone and immune functions
- ◆ Helps boost energy and decrease stress amounts
- ◆ Balance of chemical makeup within the body

Additional Information:

(30 pre-portioned packets, 120 total capsules)

Each bag includes a Vitamin C, Zinc, Probiotic, and Quercetin capsule.

Manufactured in a GMP compliant facility and strictly followed GMP standards. Each bottle meets the highest standards of safety, potency, and purity.

Directions:

Adults: one pre-portioned packet per day. We suggest taking Immune Pack contents with food, preferably a lunchtime meal.

Storage:

Best stored at 20-25 Celsius (68°F to 77°F). Keep it away from exposure to direct sunlight, high heat, and high humidity.

Pairs well with:

Wellness Warrior D3 or Digest.
